CAREER SUMMARY

Hello. I'm a QA engineer specialising in frontend testing and process tuning for teams. 10+ years of testing all kinds of apps in multinational companies. I like to work in big companies, but first of all appreciate the people with whom and for whom I work. I like to make a complicated workflow accurate, transparent, logical and understandable. My priorities are refining a product on every stage of development, making users and dev team happy.

WORK EXPERIENCE

QA Automation Engineer Ring Central

2018 - Present

Development of e2e functionality tests, tuning of QA processes, setup of development cycle for a team.

Achievements:

- Converted tests from javascript to typescript. Made tests clear and understandable.
- Refactored page objects for tests from extensions to components. Simplified maintenance.

Technologies used:

Webdriver.io Chai Mocha Scrum Allure Gitlab React

QA Engineer Yandex

2012 - 2018

Creating test design. Taking an active part in development of user interface. Analysing bugs, reports, comparing products with competitors. Improving workflow for all team members. Implementing autotests and setting tasks to automation tester.

Achievements:

- Successfully tested massive app from scratch to release being the only QA in the project. The app was rated more then 4.5 stars in Google Store.
- Implemented scrum in two teams.

Technologies used:

Webdriver.io Chai Allure reports Scrum Kanban Manual testing Test planning

QA Engineer Kongsberg Maritime

2009 - 2012

Functional, interface and stress-testing of hardware-software complex «Maritime simulator». Development of regression tests and sets of test-cases from scratch. IT-coordination - installing, setting up and maintenance of network hardware for keeping Russian office in an international office network.

Achievements:

- Created and implemented workflow for testing cycle.
- Implemented testing on early stages of development, which made functional testing faster.
- Added automation for regression: scripts for physical engine testing (lisp), tests for interface (MS Test Manager)

Technologies used:

Test planning Regression Manual testing Scrum VS Test Professional
